

INNER IP2 PACKAGING

CODE:490

HIGH PERFORMANCE POLYPROPYLENE JAR AND SEALED CLOSURE

SUITABLE FOR MOST CORROSIVES AND TOXIC SUBSTANCES

NOTES:

The **BioJar™** has a Nominal Capacity of 1.5 Litres, and is capable of withstanding

95 kPa (1 Bar)

The closure is internally threaded polypropylene which is secured tightly by the use of the handle at the head. The standard bung seal is EPDM.

This container is suitable for a wide variety of uses.

It is the Shippers responsibility to ensure that products are compatible with their containers and closures.

This **BioJar™** Jar may be transported in a variety of outer packagings and can be used as a **Primary Receptacle** or **Secondary Packaging** under ICAO/IATA Packing Instruction 620 for Infectious Substances and under IATA Packing Instruction 650 for Diagnostic Specimens.

Further details on Request.
