2 x GP 2119 Gel Packs @ -18°C
Inner Carton (Not Supplied)

Pre - Assembly Instructions

2 x Gel Pack illustrated YELLOW should be stored @ -18° C in a cold store for a minimum of 48 hours prior to use.

2 x Gel Pack illustrated BLUE should be stored @ +5° C in a cold store for a minimum of 48 hours prior to use.

Assembly Instructions

Once Gel Packs have been stored as indicated in the pre-assembly instructions they can be placed into the shipper, immediately.

Place Gel Pack around the product as indicated on the diagram.

Fit EPS shipper lid on top and secure outer carton flaps once the Gel Packs and product are assembled.

NB. Gel Packs are supplied in white bags and are illustrated as YELLOW or BLUE for ease of assembly on the diagram only.

Assembly Instructions must be strictly adhered to. Customers are advised to check the appropriateness of this package for their own shipping conditions prior to use.
