Passionate about packaging

If you are looking for a well established company that specialise in the development of dangerous goods packaging solutions, don't take our word for it....

“

...knowledgeable and at every stage our demands were met with constructive advice and guidance.

The final product delivered above expectations and fully compliant with UN regulations.

...the assembly instructions are brilliant thank you, and talking us through what we needed was great.

”

“

...I was very impressed with your customer service and quick response so I won't be hesitating to come back to you in the future.

”

Air Sea Containers have been providing packaging for the transport of dangerous goods for over 37 years. In that time we have developed a range of off the shelf pre-approved and custom made solutions that give a great range of benefits.

If you cannot find what you are looking for, Air Sea is on hand to help.

- Expert knowledge
- Free advice & Technical support
- Worldwide locations

Air Sea Custom Made can provide you with a unique solution that fits your exact requirements.

We understand the transport regulations and can guide you through the process.

The Process

We'll arrange a time that is convenient with you to discuss, either face-to-face or over the telephone, what it is you're shipping, as well as all of the variables involved, such as the mode of transport, substance type(s) being shipped, external environments and so on.

Then, based on your answers, we'll use our expert understanding of the regulations to give you a range of options explaining the pros and cons of each. We'll explain the stages involved and once you're happy to proceed we'll get straight to work on a solution that is economic, effective and compliant.

We'll start the design process and present you with some prototype samples.

Lastly, we'll provide you with instructions on how to package your goods safely and in-line with the way they were tested. And, if you would like, we can provide on-site training for you and your team, as well as instructional videos.

Once you're happy with the look and feel of the packaging we've proposed, we'll start the testing process in order to make sure it complies with regulations and, where applicable, gain UN certification.

After approval has been granted, we'll manufacture the packaging for you and either ship it to your premises, or keep a stock of it in our warehouse - whichever you prefer.
